

# LEARNFLEX™ ECLASSROOM FEATURES

**LearnFlex™**  
▷ is the perfect fit for Learning Management

## OVERVIEW

The LearnFlex™ E-Classroom module makes teaching much more effective and learning more enjoyable! With LearnFlex™ you can educate, demonstrate, and collaborate in real-time without the need for travel. Hundreds of learners can connect simultaneously – across town or across the world. You can teach more students in less time, thus meeting and exceeding your teaching objectives.

Enjoy real-time collaboration tools like instant messaging, bookmarks, and notebooks. The customized environment helps teachers to create content, conduct presentations, and track and control participation more effectively.

## FEATURES

- **Flexible Content Distribution** – designed for low bandwidth as well as high bandwidth content distribution. Completely web-based, and does not require any 3rd party downloads.
- **Library** – the library is used to store documents that are related to a course. Teachers, as well as students, can upload documents into the library. This document repository has version control functionality, and the ability to associate documents written in different languages (e.g. French and English versions of the same document). The library will store many file formats, including MS Word, MS PowerPoint, MS Excel, and Adobe Acrobat.
- **Chat** – class discussions can be for small groups, (as few as two users – which can be used by an instructor for counseling or mentoring), or for the entire class. These choices are made available within the instructor's view of the chat rooms.
- **Instant Messenger** – the Instant Messenger allows for peer-to-peer, and peer-to-instructor private communication, while the student is working through a course.
- **Quick Poll** – allows the instructor to broadcast a single question in order to assess the views of learners who are currently online. Results are automatically tabulated and displayed for the instructor.
- **Attendance Tracking** – LearnFlex™ facilitates user attendance tracking by means of the attendance tool.
- **Workbook** – the workbook tool allows notes to be taken regarding a course, and then to be saved online. This gives students and teachers access to their course-related notes anytime, anywhere.
- **Forum** – class conferences can be for small groups (as few as two users – which can be used by an instructor for counseling, mentoring or individual questions and answers), or for the entire class. These choices are made available within the instructor's view of the class conferences.
- **Instructor Contact Information** – students can view contact information that an instructor has made available such as phone numbers, e-mail addresses, or pictures.
- **Survey Tool** – the survey tool allows instructors and administrators to create and publish surveys to achieve a variety of objectives, including; instructor feedback, course feedback, lesson and system feedback.
- **Participant Management** – features put the moderator in control with attendee lists, permission granting, and sequenced hand-raising.
- **Flexible Configuration** – The E-Classroom is configured in real-time, per course. This means that a moderator, administrator, or instructor can enable or disable the content and tools at any time.

Content management and content sharing in the LearnFlex™ system is curriculum-driven, designed to enhance student performance, and provide instructors with complete control within the course environment. LearnFlex™ provides instructors with greater control over creating and managing course content, course navigation, and expanded course “real-estate.”

Designed for advanced and novice users, instructors have complete flexibility to link assignments, add tests, create surveys, offer self-tests, and evaluations.

Built on the most solid technological architecture available on the market today, LearnFlex™ is an extraordinary environment for extending the learning process while improving the management practices of your organization.

### BENEFITS

- Collaborate in real time, regardless of internet connection speed. Instructors can be assured that everyone sees the same material at the same time.
- Give students real-time access to their current standings in a course.
- Create customized learning plans and assign mandatory courses to students.
- Create dynamic content to enhance your seminars and teaching sessions.
- Focus discussions and presentations within small groups.
- Communicate more effectively to remote or off-site students.
- Gain instant access to student achievements.
- Training dollars can be invested in education, instead of wasted on logistics.
- Work disruption and staff travel are minimized.
- Content is easily updated and distributed.
- Students receive consistent content, anywhere, anytime.
- Library allows for convenient access to learning and reference materials.
- Improve peer-to-peer communication, and create communities of practice.
- Single source of organizational knowledge that includes training, reference, and organizational information.
- Efficiently distribute pre-and post-assessments for traditional course instruction.
